PROJECTS

1. Shoot out — JS, HTML, CSS.

It is a 2 player game where each player can shoot and the one's health which reaches 0 first fails. It has 5 rounds in total and the player with maximum wins will be the winner.

2. Snake and Apple — JS, HTML, CSS.

It's the well-known snake game. Apple appears in random places and eating it increases game score and snake's length. The game is over when the snake crashes any wall or on itself.

3. Count on you — JS, HTML, CSS.

It is a counter built on Javascript, this allows the user to count the number of people entering. It allows us to add, delete and store data of people entered.
